

Requirement Analysis Phase
Customer Journey Map

Date	01 October 2026
Team ID	SWTID-2026-7059
Project Name	FitBuddy
Maximum Marks	4 Marks

1. Introduction

The Customer Journey Map visualizes the end-to-end experience of different users (personas) interacting with **FitBuddy**. It captures each touchpoint, the user's thoughts and emotions at each stage, pain points encountered, and opportunities for improvement. This helps the development team design a user-centric solution that addresses real needs effectively.

2. User Personas

Attribute	Persona 1 – Primary User	Persona 2 – Intermediate User	Persona 3 – Admin User
Name	Ravi Kumar	Priya Sharma	Admin / Educator
Age	26	30	—
Occupation	Software Engineer	School Teacher	System Manager
Fitness Goal	Weight loss & improve stamina	Build muscle & improve flexibility	—
Intensity	Low to Medium	High	—
Tech Savviness	High	Medium	High
Main Pain	No time to research workouts; generic plans don't fit schedule	Existing plans do not adapt to her feedback or progress	Needs quick overview of all users without querying DB directly
Motivation	Free personalized plan without paying a personal trainer	Plans that evolve with her performance and preferences	Monitor usage, delete inactive/test accounts easily

3. Customer Journey Map – Ravi Kumar (Primary Persona)

Scenario: Ravi hears about FitBuddy, visits the website, generates his first personalized workout plan, refines it with feedback, and returns the following week.

Row	Stage 1: Discovery	Stage 2: Onboarding & Input	Stage 3: Plan Generation	Stage 4: Review & Feedback	Stage 5: Ongoing Use
Actions	Hears about FitBuddy from a friend or social media. Opens the website URL in a browser.	Lands on the home page. Reads form fields. Enters name, user ID, age, weight, goal, and intensity level.	Clicks "GENERATE MY PLAN". Sees the loading hint "Generating your plan with Gemini AI...". Waits for response.	Reads the 7-day workout plan and nutrition tip on the result page. Submits feedback: "add more cardio on Day 3".	Returns to FitBuddy next week to generate a new plan with updated weight and revised goal.
Touchpoints	- External: social media / word of mouth - Browser URL entry	- GET / → index.html - HTML form: 6 input fields - POST /generate-workout	- Pydantic input validation - Gemini Pro API call - Gemini Flash API call - SQLite: save_user(), save_plan()	- result.html (plan + tip) - Feedback form - POST /submit-feedback - Gemini Pro: update_workout_plan()	- Returns to GET / - Re-enters same User ID - New plan replaces old one in DB
Thoughts	"This looks interesting — a free AI fitness app!"	"The form is clean. I hope it doesn't require sign-up or payment."	"It's taking a while... is it working? The loading message helps reassure me."	"This plan is actually detailed! But I wish Day 3 had more cardio."	"I can reuse this every week as my goals change. Very convenient."
Emotions	😊 Curious / Hopeful	😐 Neutral / Focused	😬 Slightly anxious (long wait)	👑 Impressed / Engaged	😌 Satisfied / Loyal

Row	Stage 1: Discovery	Stage 2: Onboarding & Input	Stage 3: Plan Generation	Stage 4: Review & Feedback	Stage 5: Ongoing Use
Pain Points	- No landing/about page - No sample plan preview	- No hint for goal format - No form autofill/save	- Response takes up to 60s - No progress indicator - API may fail occasionally	- Plan not downloadable - Feedback purpose unclear	- No plan history view - No user login / account - DB resets on Vercel cold starts
Gains	- Free to use, no cost - No sign-up required	- Simple, clean dark UI - Mobile responsive form	- AI-powered, personalized - Nutrition tip included - Plan saved automatically	- Detailed structured plan - Feedback loop works - Original plan preserved	- Reusable each week - Admin dashboard available
Opportunities	- Add a landing/about page - Show sample plan preview	- Suggest popular goal options - Remember last form inputs	- Add step-by-step progress bar - Implement streaming response	- Add PDF export button - Add shareable plan link - Clarify feedback text box	- User login & plan history - Persistent cloud database - Weekly plan reminders

4. Key Improvement Opportunities

OPP ID	Opportunity	Description	Priority
OPP-01	Landing Page	Add a landing/about page that explains FitBuddy's features and shows a sample AI-generated plan to attract and inform first-time visitors before they use the form.	Medium
OPP-02	Progress Feedback	Implement a streaming response or animated progress bar while Gemini generates the plan, significantly reducing perceived wait time and user anxiety.	High
OPP-03	PDF Export	Add a "Download as PDF" button on the result page so users can save and share their 7-day workout plan for offline use or printing.	Medium
OPP-04	User Authentication	Introduce user login with a persistent cloud database (e.g., PostgreSQL on Supabase) so users can access their plan history across multiple sessions and devices.	High
