Project Name	FitBuddy
Maximum Marks	4 Marks

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

FitBuddy – Target User Empathy Map

THINK AND FEEL • Wants a fitness plan that matches personal goals, age, interests and current ability. • Worries about injury, overtraining and doing exercises incorrectly. • Feels frustrated when generic routines do not fit their needs or progress. • Fears losing motivation when results are slow. • Aspires to become healthier, stronger and more consistent.	HEAR • Friends suggest routines based on their own experience. • Trainers emphasize proper form, consistency and gradual progress. • Peers discuss workout challenges, results and diet tips. • Fitness influencers promote new exercises, challenges and trends. • Hears that consistency matters, but needs guidance that fits daily life.	SEE • Many fitness apps offer generic or pre-set workout plans. • Gym environments contain different equipment, people and fitness levels. • Social media feeds show idealized transformations and trending workouts. • Online plans vary widely in difficulty and suitability. • Sees a need for simple, personalized guidance instead of trial and error.
SAY AND DO • Enters personal details such as name, age, aim and interests. • Tries different workouts and adjusts routines through trial and error. • Complains when a rigid plan is too difficult, repetitive or time-consuming. • Follows workouts when they are clear, practical and achievable. • Uses feedback to communicate what is working and what needs to change.	PAIN • Lack of personalization in generic workout plans. • Fear of injury from unsuitable exercises or excessive intensity. • Burnout and loss of motivation from repetitive routines. • Time wasted searching for suitable workouts. • Slow or unclear progress makes it difficult to stay consistent. • Rigid plans do not adapt when needs, interests or feedback change.	GAIN • Customized 7-day workout routine based on personal inputs. • Dynamic plan adaptation after user feedback. • Convenient, easy-to-follow daily workout guidance. • Exercises aligned with the user's aim, interest and ability. • Success measured through consistency, progress and improved fitness. • Less trial and error, greater confidence and motivation.
