FitBuddy – Customer Problem Statements:

PS ID	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A beginner in fitness, aged 22 –35, with a busy work or study schedule and no knowledge of exercise science.	Get a clear, structured 7-day workout routine that matches my age and fitness aim, without having to research it myself.	The plans I find online and in apps are generic, overwhelming, and don't fit my age, level, or goal.	Most fitness content is one-size-fits-all and is not generated from the individual's own inputs (age, aim, interest).	Overwhelmed, confused, and discouraged before I even start.
PS-2	A budget-conscious college student or early-career professional who cannot afford a personal trainer or paid coaching subscription.	Get a personalised weekly plan quickly, at little or no cost, by entering just a few details.	Personal trainers are expensive, and piecing together a plan from many websites and videos takes hours.	Personalised coaching is locked behind paid subscriptions and manual consultations, with no instant, accessible alternative.	Frustrated, excluded, and unsure whether fitness is for people like me.
PS-3	A motivated, interest-driven person who enjoys specific activities (e.g., yoga, running, dance, home workouts).	Build a routine around activities I actually enjoy so I can stay consistent.	Plans focus only on the goal and ignore my interests, so they feel repetitive and boring.	Many generators treat the goal (e.g., weight loss) as the only input and do not use personal interests to shape the routine.	Bored, unmotivated, and likely to quit within a couple of weeks.
PS-4	An existing user already following a plan, who finds it too easy, too hard, or not suited to my progress.	Give feedback on my plan and quickly receive an updated 7-day routine that reflects it.	My plan stays the same no matter what I say; I must start over or edit it manually.	Most plans are static and have no feedback loop, so they cannot adapt to how my body and schedule respond.	Ignored, stuck, and frustrated that the plan doesn't grow with me.
PS-5	A health-conscious adult (often 40+), cautious about injury and new to AI-generated advice.	Follow a routine with an intensity that is suitable and safe for my age and aim.	I'm unsure whether the generated plan is appropriate for me or whether I can trust what the AI suggests.	Generic plans do not account for age, and AI output can feel like a black box with no clarity on how it was tailored to my inputs.	Anxious, uncertain, and hesitant to trust or follow the plan.

PS ID	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-6	A platform administrator / product owner responsible for the quality and safety of the AI-generated plans.	Inspect the workout plans generated for users to check they are appropriate, consistent, and correctly structured.	I cannot easily see what Gemini has produced for each user, so unsafe, irrelevant, or inconsistent plans can go unnoticed.	AI outputs vary from request to request, and without a dedicated admin view the generated plans are not centrally visible or reviewable.	Worried, uneasy, and lacking control over the quality users receive.
PS-7	A platform administrator who monitors how the feedback mechanism performs and who wants to improve the product over time.	Understand how user feedback changes the plan, by comparing the original plan with the regenerated one.	I cannot tell whether regenerated plans genuinely address user feedback or just reshuffle the same content.	Plan versions and the related user inputs and feedback are not presented side by side for review.	Blind to what works, and frustrated that I can't confidently improve the product.
