

FitBuddy – Sprint Story Points & Velocity

Sprint: A fixed period in which the team works to complete a set of tasks.

Epic: A large feature or project area broken into smaller stories.

Story: A small, deliverable task that forms part of an epic.

Story Point: A relative measure of the effort required to complete a story, using the scale 1, 2, 3, 5.

Sprint 1 – User Input & AI Workout Plan

User Input & Validation (US1) – 3 Story Points

Gemini Workout Plan Generation (US2) – 5 Story Points

7-Day Plan Display (US3) – 3 Story Points

Database Storage (US4) – 4 Story Points

Total Story Points in Sprint 1 = $3 + 5 + 3 + 4 = 15$

Sprint 2 – Nutrition, Feedback & Web Interface

Nutrition / Recovery Tips (US5) – 3 Story Points

Feedback-Based Plan Update (US6) – 5 Story Points

Web Interface Integration (US7) – 3 Story Points

API Endpoints & Validation (US8) – 5 Story Points

Total Story Points in Sprint 2 = $3 + 5 + 3 + 5 = 16$

Sprint 3 – Admin Dashboard & Testing

Admin Dashboard (US9) – 3 Story Points

Testing & Refinement (US10) – 3 Story Points

Total Story Points in Sprint 3 = $3 + 3 = 6$

Total Story Points & Velocity

Sprint 1 = 15 Story Points

Sprint 2 = 16 Story Points

Sprint 3 = 6 Story Points

Total Story Points = $15 + 16 + 6 = 37$

Number of Sprints = 3

Velocity = Total Story Points Completed / Number of Sprints

Velocity = $37 / 3 = 12.33$ Story Points per Sprint
