

Problem-Solution fit canvas 2.0

Purpose / Vision FitBuddy simplifies creating structured, personalized fitness routines using AI

Define CS, fit into	1. CUSTOMER SEGMENT(S) Who is your customer? Individuals who want to improve their fitness, such as weight loss, muscle gain or general wellness. Beginners who lack the knowledge to build a structured routine. Fitness enthusiasts who want adaptable plans without the cost of a personal trainer.	6. CUSTOMER What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available Budget: personal trainers and nutritionists are often too expensive. Knowledge: limited expertise in exercise science and nutrition to build safe, effective routines. Time: little time to research and assemble a complete 7-day plan from scratch. Devices: needs a solution that works in a standard web browser on mobile or desktop.	5. AVAILABLE SOLUTIONS Which solutions are available to the customers when they face the or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. men and naner is an alternative to digital Generic online templates (PDFs, blogs): free and accessible, but static and not personalized. Standard fitness apps: inexpensive and convenient, but plans do not adapt to natural-language feedback. Personal trainers and nutritionists: highly personalized, but costly and tied to fixed schedules.	Explore AS,
	2. JOBS-TO-BE-DONE / PROBLEMS Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides. Get a structured, personalized 7-day workout plan based on age, weight, goal and intensity. Adjust the routine as needs, progress or preferences change (e.g. more cardio, more rest days). Receive nutrition and recovery tips that match the fitness goal and support training.	9. PROBLEM ROOT CAUSE What is the real reason that this problem exists? What is the back story behind the need to do this inh? Effective training and nutrition depend on personalization, but this level of guidance has traditionally required expensive professionals. Generic plans fail because they cannot adapt to individual feedback, changing preferences or physical constraints, so motivation and adherence drop over time.	7. BEHAVIOUR What does your customer do to address the problem and get the job i.e. directly related: find the right solar panel installer, calculate usage and benefits: indirectly associated: customers spend free time on volunteering work Search online for generic queries such as "best workout for weight loss" or "how to build muscle". Try several fitness apps by trial and error, often abandoning static plans after a short time. Go to the gym without a clear plan, leading to inefficient workouts.	
Focus on J&P, tap into BE,	3. TRIGGERS What triggers customers to act? i.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news. Starting a fitness journey and not knowing where to begin; hitting a plateau with a generic routine; feeling bored or fatigued and wanting changes such as more cardio or more rest days.	10. YOUR SOLUTION If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour. FitBuddy is a web application built with FastAPI and Google Gemini models. It generates a personalized 7-day workout plan from the user's age, weight, goal and workout intensity. Users can submit feedback (e.g. "more cardio") so the plan is regenerated and refined by AI. A goal-based nutrition or recovery tip complements the plan. User data and plans are stored in SQLite and are available through API endpoints and an interactive HTML interface.	8. CHANNELS of BEHAVIOUR 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7 Fitness forums and subreddits, YouTube workout channels, health and wellness blogs, and app stores.	Extract online & offline CH of
	4. EMOTIONS: BEFORE / AFTER How do customers feel when they face a problem or a job and afterwards? i.e. lost, insecure > confident, in control - use it in your communication strategy & design. Before: overwhelmed by conflicting advice, unmotivated and frustrated by slow progress. After: confident in a clear routine, supported by targeted advice and in control of their fitness journey.		8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development. Local gyms and health clubs, sports clubs, and conversations with friends and peers who exercise.
